WELCOME MESSAGE

Dear Friends,

Greetings from the Organising Committee of IORACON 2016. We, the Orthopaedic Rheumatologists mainly deal with clinical problems involving joints, soft tissues and allied conditions of connective tissues. The term rheumatology originates from the Greek word "rheuma" meaning "that which flows as a river or stream" and the suffix "ology" meaning "the study of."

Orthopaedic Rheumatology is a rapidly evolving medical specialty. Pathogenesis of major rheumatological disorders is now described as autoimmune disorders. New scientific discoveries of this specialty are largely related to better understanding of immunology of these disorders. Immunology explains pathogenesis and the characteristics of rheumatological disorders and most of the new treatment modalities are based on immunology. Better understanding of genetic basis of rheumatological disorders makes rheumatology a rapidly developing medical specialty based on new scientific discoveries.

The 8th Annual Conference of IORA (Indian Orthopaedic Rheumatology Association) is being held at Guwahati on 22nd & 23rd October 2016 in collaboration with NEROSA.

Guwahati is gateway to North East India and is wellconnected with rest of the country by Rail, Road & Air.

We look forward to wellcome your active participation at IORACON 2016.

Dr. S. Lahkar
Org. Chairman
IORACON 2016
